*Allowable Subject Matter*

1. Claims 1-12 are allowed.
2. The following is an examiner's statement of reasons for allowance: The present invention teaches web-based imaging methods using networked and autonomous group composition stores that reference graphics from an external graphics store. Each independent claim identifies the distinct feature of a networked an autonomous group composition store for storing and providing imaging clients access to a plurality of compositions, with each different composition referencing at least one graphic in the at least one graphic store that is external to the group composition store and including information on a placement of each referenced graphic on a canvas, wherein at least two of the compositions reference the same graphic in the same graphic store without duplicating the graphic. The closest prior art, Marshall et al. U.S. Publication 2002/0097259 and Hoyle U.S. Patent 6,771,290 teach a networked and autonomous group composition store that stores a plurality of group compositions, i.e. memories products that includes graphics from external sources and a networked and autonomous database of user profiles that reference the memories products in the group composition store. In the case of the Marshall reference, Marshall et al. teach user profiles in a user profile store and a group composition store that stores a plurality of group compositions referencing graphics. In the case of the Hoyle reference, Hoyle teaches a user profile store that is networked and autonomous. The prior art fails to teach each composition stored in the group composition store including information on a placement of each referenced graphic on a canvas, wherein at least two of the

compositions reference the same graphic in the same graphic store without duplicating the graphic. The prior fails to anticipate or render the above limitations obvious.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
